**ICONS OF THE '90 - FROM BEDROOM POSTERS TO OPEN ROADS**

This summer, Autoworld Brussels is turning back the clock with "Icons of the '90s," an exhibition running from 8 July to 6 September. Dedicated to one of the most influential decades in recent history, the show brings together an eclectic selection of cars, motorcycles and mopeds that capture the freedom, innovation and pop-culture energy of the 1990s.

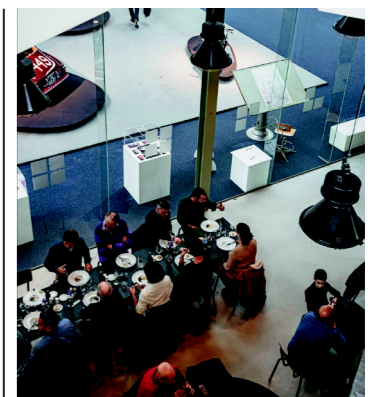

The exhibition places the automobile at the heart of a decade shaped by MTV, video games, grunge, hip-hop, the rise of the Internet and the first mobile phones. In the automotive world, the 1990s introduced bold styling, new technologies, more compact concepts and a renewed focus on driving pleasure. From city cars and hot hatches to roadsters, sports saloons and supercars, the decade produced models that have since become true icons.

the Mazda MX-5 Miata, Renault Twingo, Peugeot 205 GTI, Renault Clio Williams, Toyota Supra, Nissan Skyline and Honda NSX. Spectacular performance models such as the Bugatti EB110, Dodge Viper, Ferrari F50 and Jaguar XJ220 show how the supercar segment pushed the boundaries of design, engineering and imagination.

The exhibition also highlights practical and innovative family vehicles, including the Renault Scénic and Fiat Multipla, alongside motorcycles that marked the revival of European brands such as Ducati, BMW and Tri-

umph. Popular mopeds from Honda, Aprilia and Malaguti recall the freedom they represented for a generation of teenagers, often becoming as much a part of youth culture as music, fashion and technology.

Blending nostalgia, design, performance and pop culture, "Icons of the '90s" celebrates a decade that continues to inspire enthusiasts today. In the distinctive setting of Autoworld, it offers visitors the chance to rediscover the vehicles, atmosphere and attitude of an era whose influence is still very much alive.
